## WORK EXPERIENCE

### Webtiginoso

May 2022 – November 2022

Fullstack Developer

*Remote(Santiago de Chile, Chile)*

- Developed Takenjobs's front end, a platform oriented to thousands of users looking for jobs in different industries. It was created using Typescript, React, Sass, and Framer Motion. We used NodeJs API and MongoDB for the backend.
- Implemented login, registration, and password reset with email or social accounts like Google and Facebook using Firebase Auth.
- Implemented functionalities such as maps (Google Maps API), user location, and document storage using Google Cloud Platform's Services.
- Collaborated with backend developers for API design, development, and decision-making.
- Collaborated with frontend developers and UX/UI designers to design the platform's interface and new functionalities.
- Implemented SEO and Social Network Sharing (Twitter, Facebook, LinkedIn).
- Added SSR to the platform using PugJS as the template engine in the NodeJs backend.
- Updated and added sections to Feelrouk's platform using Javascript and CSS.

### Freelance (Upwork)

January 2022 – May 2022

Frontend Developer

*Caracas, Venezuela*

- Added new functionalities and solved errors for multiple projects using Javascript, Html, and CSS.

### UED Manuel Antonio

August 2021 – January 2022

Fullstack Developer

*Caracas, Venezuela*

- Added new functionalities to the institution's management system using Javascript, Php, Html, and CSS.
- Solved bugs and visual details using Html and CSS.

## EDUCATION/COURSES AND SPECIALIZATIONS

UNEXPO (Universidad Nacional Politécnica Experimental)

July 2022

Systems Engineering

*Caracas, Venezuela*

- Designed and developed a management system for the library using PHP, Laravel, and Vue.

COURSES(Coursera - University of Michigan)

June 2020 - May 2021

- Html, CSS, Javascript, Mobile Design, Python, and Git.

## PROYECTOS PERSONALES

- I've created multiple personal projects: AlgoUI, Crypto Portfolio Tracker, Myportfwebwr, and many others. Developed them using technologies like React, Node, Typescript, or Vue. For more information, visit my portfolio or my GitHub.
